

## **Gen Eon Cleaning System**

### **Instaflow Unit**

Cosumnes River Elementary School (CRES) is pleased to have been chosen to for the pilot program to test the effectiveness of the Gen Eon Cleaning System. This product has proven to be effective in cleanliness, efficiency, and cost-savings.

The Gen Eon Cleaning System is an effective multipurpose cleaner. The custodial staff reports that they are able to clean the school environment using one, easy to use piece of equipment. Unlike harsh cleansers, the Gen Eon Cleaning System is “green”, allowing staff to clean without being bothered by chemical smells or having to worry much about chemical burns or accidents. In addition, the school children and staff are able to work in a clean environment without the strong after-effectives of chemical cleansers.

Because this product allows for one piece of equipment to be used, the custodial staff are able to spend less time on individual cleaning projects, spend less time ordering supplies, use less space storing supplies, and staff can use this one product multiple times before more is needed. As a result, staff is able to complete tasks more quickly to ensure a clean and safe environment for students and staff.

Lastly, the Gen Eon Cleaning System is cost-effective. During this time of severe budget cuts, it is important for the EGUSD to save money in any area that it can. As noted earlier, this one piece of equipment provides multiple uses. This saves the EGUSD money by reducing the costs of supplies and the amount of time staff needed to complete tasks.

Thank you,

John Palmer
