

Leader in Toxic-free On-Site Generation Cleaning Solutions, GenEon Technologies, Introduces a Smaller, More Powerful Solution for Cleaning, Sanitizing, and Disinfecting

GenEon's New Disinfection Tool Technology Delivers Chemical-Free Cleaning Solutions to Clean and Disinfect Open and Hard to Reach Areas Effectively.

SAN ANTONIO ([PRWEB](#)) April 18, 2018 -- GenEon is the leader in cutting edge cleaning, disinfecting, and sanitizing technology, and now GenEon introduces a smaller, more compact version of its flagship disinfection tool, the new Mist 2.5. Since its inception, GenEon has been dedicated to developing and perfecting a system that changes the way cleaning solutions and cleaning systems are used to help prevent the spread of bacteria and germs. Since the company's beginning, GenEon has been at the forefront of helping businesses and homeowners keep their work space and homes free of germs that can cause serious illness. GenEon's on-site generation technology lets consumers create cleaning, degreasing, and sanitizing solutions from minerals, water, and electricity using a technology called electrochemical ion activation. These cleaning solutions are safe, eco-friendly, and sustainable. GenEon's cleaning solutions are certified by the National Sanitation Foundation (NSA) for their effectiveness and realizability.

Like its predecessor, GenEon's new Mist 2.5 delivers an exceptional chemical-free cleaning, solution in a more compact unit. Weighing in at just 4.4 pounds, The Mist 2.5 is 35% lighter than the Mist. While it's smaller, The Mist 2.5 still brings the same power to the table as as the original Mist delivery system, making it the perfect way to clean large, open spaces or even hard-to-reach areas. The Mist 2.5 features a smaller particle size than its predecessor (5-50 um), with a 16-33 foot spray reach and a .66 tank capacity. Used in conjunction with GenEon's environmentally-safe toxic-free solutions, the Mist 2.5 is designed to provide consistent coverage and even distribution, which allows you to clean, and disinfect virtually any area without worrying about leaving behind unsafe chemical residue that can be harmful to people and to the environment. The combination of GenEon's EPA registered cleaning solutions and the new Mist 2.5 can help reduce absenteeism in schools and in the workplace.

Our environment suffers through the use of toxic cleaning solutions. The Mist 2.5, with GenEon's toxic-free eco-friendly cleaning and sanitizing solutions, is the safest, most effective way to promote better health, cleaner living, and a safer environment.

GenEon's toxic-free cleaning solutions are making a difference in the way we live our lives and the way we work. It's time to change the way we clean. The Mist 2.5 is a powerful, compact, and effective way to bring about serious change and a step toward a better quality of life. It's never too late to start thinking about the future, and GenEon brings you products that are in line with a more balanced, cleaner, and safer way to make sure the eco-system and your personal environment are as clean as healthy as they can be.

To learn more about how GenEon's chemical free anti-bacterial cleaning and sanitizing solutions, home products, and the new Mist 2.5 can help keep you and the eco-system healthy, visit GenEon online.
